OBJECTIVE

Seeking an entry-level Full-Stack Developer or Software Developer position to contribute to building reliable and scalable applications. Eager to apply my practical experience, solve real-world problems, and develop innovative software solutions while continuously enhancing my technical expertise.

EDUCATION

B.Tech in ECE, Narasaraopeta Institute Of Technology, Narasaraopet **2022 - 2026**
CGPA: 8.84/10 AP, India

TECHNICAL SKILLS

Programming Languages	Java
Backend Development	Spring Boot, REST API Development, CRUD Operations
Databases	PostgreSQL, SQLite, SQL
Frontend Technologies	HTML, CSS, JavaScript
API & Testing Tools	Postman, Swagger/OpenAPI
Developer Tools	IntelliJ IDEA, VS Code, Postman, pgAdmin, DBeaver Git, GitHub
Hardware & Technologies	Raspberry Pi, RFID, Arduino, GPIO

EXPERIENCE

Software Trainee — iBEST Solutions Pvtd.Ltd **Aug 2026 – Present**

Project: Entry & Exit Management System

- Contributing to the development of an IoT-based Entry Exit Management System for residential and corporate premises to manage authorized vehicle access
- Developing backend functionalities using Java and Spring Boot to manage authorized vehicle information and access-related data.
- Creating, testing, and validating REST APIs using Postman and documenting API endpoints using Swagger/OpenAPI.
- Working with PostgreSQL for data storage and supporting integration between backend services and IoT devices.
- Collaborating on application development and testing across backend, frontend, and IoT components.

PROJECTS

Car Over Speed Alerting System

- Developed a vehicle over-speed detection system using AT89S52 microcontroller, IR transmitter/receiver, LCD, and buzzer.
- Programmed and developed the microcontroller application using Keil μVision and C51 compiler.
- Calculated vehicle speed based on the time taken between two IR sensor detection points and displayed the result on an LCD.
- Performed system testing, debugging, and hardware integration to detect and alert over-speeding vehicles.

CERTIFICATIONS & ACHIEVEMENTS

- Artificial Intelligence – 120 Hours — Naresh Technologies and Consultancy Services Topics: Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), and Prompt Engineering.
- Academic Excellence Certificate— CGPA: 8.84/10
